

JOUDI HAMDAN

Quality Assurance Engineer

Damascus, Syria | +963 936706169 | joudihamdan216@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Quality Assurance Engineer with hands-on experience in manual testing, API testing, and test automation within Agile environments. Skilled in designing test cases, validating business requirements, identifying defects, and collaborating with cross-functional teams to deliver high-quality software. Backed by a strong Flutter development background, enabling effective communication with development teams and improving software quality through technical insight.

Professional Experience

QA Engineer – Learning Go | *Damascus, Syria NOV 2025 – Present*

- Design and execute structured test cases covering functional, regression, and business-critical scenarios to ensure complete requirement validation.
- Collaborated with Product Owners to review requirements, refine user stories, validate business rules, and improve feature usability before development and release.
- Identify, document, prioritize, and track defects and edge cases using **Jira and GitLab** while ensuring proper resolution throughout the defect lifecycle.
- Perform **API testing** to validate backend functionality and ensure accurate system integration.
- Gain hands-on experience with **test automation** by developing automated test scenarios for selected application features.
- Document test cases, test scenarios, and QA processes to improve traceability and team collaboration.
- Participate in **Agile ceremonies**, including backlog refinement, sprint planning, feature validation, and release verification.

Scrum Master & QA Tester – TechSauce | *Damascus, Syria July 2025 – Oct 2025*

- **Scrum Facilitation:** Led Agile ceremonies for **two concurrent projects**, ensuring task alignment and removing blockers for the development team.
- **Requirement Validation:** Ensured implemented features met Acceptance Criteria, business requirements, and release readiness before deployment.
- **Quality Control:** Performed comprehensive manual testing on applications to ensure they matched technical specifications and user requirements.
- **Task Management:** Monitored project progress and task distribution, ensuring timely delivery and high-quality standards.

Skills

- **Agile & Management:** Scrum Framework, Facilitation, Task Tracking, Sprint Planning, Acceptance Criteria Validation.
- **Testing:** Manual Testing, API Testing , Test Case Design, Bug Reporting, Functional Testing, Regression Testing, Exploratory Testing, Basic Test Automation .
- **Tools:** Jira, GitLab, Postman, Firebase, Swagger.
- **Technical Background:** Flutter, Bloc, GetX, REST APIs, JSON, Clean Architecture.
- **Soft Skills:** Problem-Solving, Analytical Thinking, Attention to Detail, Effective Communication, Team Collaboration, Adaptability, Time Management, and Requirement Analysis.

Projects

- **MERSOOL – Food Delivery App**
 - Developed using Flutter and Bloc, while validating application workflows through structured functional testing.
 - Tested core features including ordering, tracking, and location services.
 - Identified edge cases and improved user experience and stability.
- **DAHAB CLINIC MANAGEMENT**
 - Developed using Flutter and GetX.
 - Tested appointment scheduling and patient management features.
 - Validated multi-language support and UI themes.
- **RIDESHARE APP**
 - Tested booking and ride tracking functionality.
 - Validated real-time location features.

QA Practices

- Test Planning
- Test Case Design
- Requirement Analysis
- Defect Lifecycle
- SDLC & STLC
- Regression Planning

Education

Bachelor's Degree in Information Technology Engineering (Software Engineering)

Damascus University (Graduated 2025)
